ADDITIONAL INFORMATION

Agency Name:Indian Health Service

Description:

The primary purpose of this program is to reduce the prevalence of suicide among American Indian and Alaska Native (AI/AN) populations. Tribes can accomplish these goals by:

1. Improving care coordination;
2. Expanding behavioral health care services through the use of culturally appropriate evidence-based and practice-based models to address these issues; and
3. In addition to any proposed activities for the adult population, develop, or expand on activities for the Generation Indigenous (Gen-I) Initiative by implementing early intervention strategies for American Indian / Alaska Native (AI/AN) youth at risk for suicidal behavior.

In alignment with the IHS 2019-2023 Strategic Plan Goal 1: To ensure that comprehensive, culturally appropriate personal and public health services are available and accessible to American Indian and Alaska Native people, the Substance Abuse and Suicide Prevention (SASP) program is designed to ensure access to comprehensive, culturally appropriate services and promote quality programming to address suicide for AI/AN youth and adults. The IHS supports Tribal efforts that include addressing suicide prevention, intervention, and postvention from a community-driven context. The IHS encourages applicants to develop and submit a plan that emphasizes cross-system collaboration, the inclusion of family, youth, and community resources, and culturally appropriate approaches.

This is only a forecast. The synopsis and application package are not yet posted, and we have not yet finalized the application due date. This opportunity will be updated when it is published in the Federal Register.
