**ADDITIONAL INFORMATION**

---

**Agency Name:**

Centers for Disease Control - NCCDPHP

**Description:**

The CDC, Division of Cancer Prevention and Control (DCPC) announces the availability of Fiscal Year 2022 funds to implement DP22-2202, a National Cancer Prevention and Control Program. This Notice of Funding Opportunity (NOFO) supports the achievement of the following cancer prevention and control goals: eliminate preventable cancers, ensure all people get the right screening at the right time for the best outcome, and support cancer survivors in a manner that allows them to live longer, healthier lives. This program takes a comprehensive, coordinated approach to achieve these goals and advance health equity. It supports: breast and cervical cancer screening services, cancer control plan implementation by coalitions, and surveillance programs to monitor and report cancer burden.

These priorities will be accomplished by funding three national programs:

Program 1: National Breast and Cervical Cancer Early Detection Program (NBCCEDP) supports clinical services for women with lower incomes who are uninsured or underinsured and implementation of evidence-based interventions in the clinics that serve them.

Program 2: National Comprehensive Cancer Control Program (NCCCP) supports cancer coalition efforts that use their individual and collective resources to plan and implement evidence-based strategies as described in jurisdiction-wide cancer plans.

Program 3: National Program of Cancer Registries (NPCR) supports the implementation of a population-based core Cancer Registry program.
