ADDITIONAL INFORMATION

Agency Name: DOT Federal Highway Administration

Description:

The FAST Act, Public Law 114-94, Section 1123, established the NSFLTP Program to fund nationally significant projects to construct, reconstruct, or rehabilitate transportation facilities within, adjacent to, or accessing Federal and Tribal lands. A strong transportation network is critical to the functioning and growth of the American economy. The Nation's industry depends on the transportation network to move the goods that it produces, and facilitate the movements of the workers who are responsible for that production. When the Nation's highways, railways, and ports function well, that infrastructure connects people to jobs, increases the efficiency of delivering goods and thereby cuts the costs of doing business, reduces the burden of commuting, and improves overall well-being.
