ADDITIONAL INFORMATION

Agency Name: Health Resources and Services Administration

Description:

The purpose of the Maternal Depression and Related Behavioral Disorders (MDRBD) program is to expand health care providers' capacity to screen, assess, treat and refer pregnant and postpartum women for maternal depression and related behavioral disorders (e.g., anxiety, substance use disorder) including in rural and medically underserved areas, and geographic areas with high rates of maternal mortality and severe morbidity. This will be accomplished by establishing, improving, or maintaining programs that provide real-time psychiatric consultation, referral, and culturally competent training to maternity care providers and practices.
