Eligibility

Eligible Applicants:	Others (see text field entitled "Additional Information on Eligibility" for clarification)
Additional Information on Eligibility:	You can apply if your organization is in the United States, the Commonwealth of Puerto Rico, the Northern Mariana Islands, American

Additional Information

Agency Name: Health Resources and Services Administration

Description: The purpose the Rural Health Network Development Planning Program is to plan and develop integrated health care networks that collaborate to address the following legislative aims: (i) achieve efficiencies; (ii) expand access to and improve the quality of basic health care services and health outcomes; and (iii) strengthen the rural health care system. This program supports one year of planning and brings together members of the health care delivery system, particularly those entities that may not have collaborated in the past, to establish and/or improve local capacity to strengthen rural community health interventions and enhance care coordination. The program uses the concept of developing networks as a strategy toward linking rural health care network members together to address local challenges, and help rural stakeholders achieve greater collective capacity to overcome challenges related to limited economies of scale for individual hospitals, clinics, or other key rural health care stakeholders.
