NOTE: This is a Forecasted Opportunity.

General Information

Document Type:	Grants Notice	Version:	Forecast 1
Opportunity Number:	CDC-RFA-CK-25-0018	Forecasted Date:	Aug 07, 2024
Opportunity Title:	Modeling Infectious Diseases in Healthcare (MInD Healthcare) to Improve Pathogen Prevention and Healthcare Delivery	Last Updated Date:	Aug 07, 2024
		Estimated Post Date:	Jan 31, 2025
		Estimated Application Due Date:	Apr 02, 2025 Electronically submitted applications must be submitted no later than 11:59 pm

Opportunity Category:	Discretionary		ET on the listed application due date.
Opportunity Category Explanation:		Estimated Award Date:	Jul 01, 2025
Funding Instrument Type:	Cooperative Agreement	Estimated Project Start Date:	Aug 01, 2025
Category of Funding Activity:	Health	Fiscal Year:	2025
Category Explanation:		Archive Date:	May 02, 2025
Expected Number of Awards:	6	Estimated Total Program Funding:	\$ 19,500,000
CFDA Number(s):	93.084 -- Prevention of Disease, Disability, and Death by Infectious Diseases	Award Ceiling:	\$ 650,000
Cost Sharing or Matching Requirement:	No	Award Floor:	\$ 550,000

Eligibility

Eligible Applicants:	Public and State controlled institutions of higher education Private institutions of higher education Special district governments County governments
-----------------------------	--

Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education

State governments

Native American tribal governments (Federally recognized)

City or township governments

Native American tribal organizations (other than Federally recognized tribal governments)

Additional Information on Eligibility: Applicant organizations that request funding above the ceiling amount listed in Funding Details of this NOFO will be considered non-responsive and will not be passed along for further review.

Additional Information

Agency Name: Centers for Disease Control - NCEZID

Description: The purpose of this Notice of Funding Opportunity (NOFO) is to support development of innovative and applied mathematical models and computational tools for: Modeling the spread of pathogens in healthcare settings, for example, healthcare-associated infections (HAIs) and antimicrobial resistant organisms (AROs). Predicting outbreaks of HAI pathogens and trends in the burden of antimicrobial resistant and susceptible HAIs. Assessing the effectiveness of intervention strategies. This NOFO will increase training and workforce development opportunities about applied public health modeling, including collaboration with public health partners. Models developed by HAI and ARO leaders within the Modeling Infectious Diseases in Healthcare (MiND Healthcare) network could help public health partners make informed decisions and optimize evidence-based prevention strategies to respond to evolving public health needs and emergencies in healthcare settings.
