NOTE: This is a Forecasted Opportunity.

General Information

Document Type:	Grants Notice	Version:	Forecast 1
Opportunity Number:	CDC-RFA-DP-27-0023	Forecasted Date:	Sep 14, 2026
Opportunity Title:	Cancer Prevention and Control Programs for State, Territorial, and Tribal Organizations	Last Updated Date:	Sep 14, 2026
Opportunity Category:	Discretionary	Estimated Post Date:	Dec 07, 2026
Opportunity Category Explanation:		Estimated Application Due Date:	Feb 05, 2027 Electronically submitted applications must be submitted no later than 11:59 pm ET on the listed application due date.
Funding Instrument Type:	Cooperative Agreement	Estimated Award Date:	Jun 01, 2027
Category of Funding Activity:	Health		

Category		Estimated	Jun 30, 2027
Explanation:		Project Start	
Expected	196	Date:	
Number of		Fiscal Year:	2027
Awards:		Archive Date:	Mar 07, 2027
<u>Assistance</u>	93.898 -- Cancer	Estimated	\$ 1,260,000,000
<u>Listings:</u>	Prevention and Control Programs for State, Territorial and Tribal Organizations	Total Program	
		Funding:	
		Award	\$ 0
		Ceiling:	
Cost Sharing or	Yes	Award Floor:	\$ 0
Matching			
Requirement:			

Eligibility

Eligible	Native American tribal governments (Federally recognized)
Applicants:	County governments
	Others (see text field entitled "Additional Information on Eligibility" for clarification)
	Private institutions of higher education
	State governments
	City or township governments
	Public and State controlled institutions of higher education
	Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
	Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education
	Native American tribal organizations (other than Federally recognized tribal governments)
Additional	The eligibility above pertains only to Program 2. Program 1: The National
Information on	Breast and Cervical Cancer Early Detection Program (NBCCEDP) Limited
Eligibility:	Eligibility: Funds will be awarded to state health departments and the District of Columbia; US Territories and Freely Associated States, Federally Recognized American Indian Tribes, Tribal Organizations, Alaska Native

Organizations, and Urban Indian Organizations, or their Bona Fide Agents. Eligibility for this program is limited by statute. See <https://www.govinfo.gov/content/pkg/STATUTE-104/pdf/STATUTE-104-Pg409.pdf> Program 3: The National Program of Cancer Registries (NPCR) Limited Eligibility: Eligibility for this program is limited by statute to State governments (includes the District of Columbia). US territories and freely associated states. Bona fide agents applying on behalf of state or territorial entities, including government organizations. See Cancer Registries Amendment Act Bona fide agents must submit documentation that demonstrates their arrangement with the eligible applicant. American Indian or Alaska Native tribal governments (federally recognized or state-recognized), American Indian or Alaska native tribal designated organizations. or their Bona Fide Agents.

Additional Information

Agency Name: Centers for Disease Control - NCCDPHP

Description: Since 1990, CDC's Division of Cancer Prevention and Control (DCPC) has been working with national organizations, state, territory, freely associated state, and tribal health agencies, and other key groups to develop, implement, and promote effective strategies for preventing and controlling cancer. DCPC's overall mission is to work toward having all people free of cancer while improving health outcomes through prevention, screening, and ongoing care for cancer survivors. DCPC supports comprehensive cancer control, a philosophical approach that brings together partners and other organizations to collectively address a community's cancer burden in a much more impactful way than any one organization could accomplish alone. This NOFO will fund eligible applicants to facilitate collaborative planning and implementation of evidence-based cancer surveillance, prevention, and control strategies in communities that improve the provision of clinical preventive services, and cancer survivorship. Ultimately, a successful implementation of the work described in this NOFO will demonstrate that by

the three programs working together through partnerships, coordination of resources and efforts, consistent communication, and community involvement, we will come that much closer to the division's mission of "All People Free of Cancer." This program takes a comprehensive, coordinated approach to achieve these goals. It supports breast and cervical cancer screening and diagnostic services, cancer control plan implementation by coalitions, and surveillance programs to monitor and report cancer burden. These goals will be accomplished by funding three national programs:

Program 1: National Breast and Cervical Cancer Early Detection Program (NBCCEDP) supports clinical services for women with low incomes who do not have adequate insurance and implementation of evidence-based interventions in the clinics that serve them. **Component A:** Supports breast and cervical cancer screening and diagnostic follow-up for women with low incomes who do not have adequate insurance.

Component B: (Optional) Supports implementation of evidence-based interventions (EBIs) shown to increase breast and cervical cancer screening.

Program 2: National Comprehensive Cancer Control Program (NCCCP) supports cancer coalition efforts that use their individual and collective resources to plan and implement evidence-based strategies as described in jurisdiction-wide cancer plans.

Program 3: National Program of Cancer Registries (NPCR) supports the implementation of a population-based central cancer registry program.
