Description

Jump to all documents

The purpose of the Landscape Scale Restoration (LSR) Program is to encourage collaborative, science-based restoration of priority forest landscapes. This competitive grant program supports collaborative high impact projects that lead to measurable outcomes on priority forest landscapes, leverage public and private resources, and further priorities identified in a science-based restoration strategy, such as a Tribal Forest Plan, State Forest Action Plan, or other equivalent restoration strategy. **Proposals should reduce wildfire risk, improve fish and wildlife habitats, maintain or improve water quality and watershed function, and/or mitigate invasive plants, insects, and disease.**
